

8 SWATH Irregular Waves

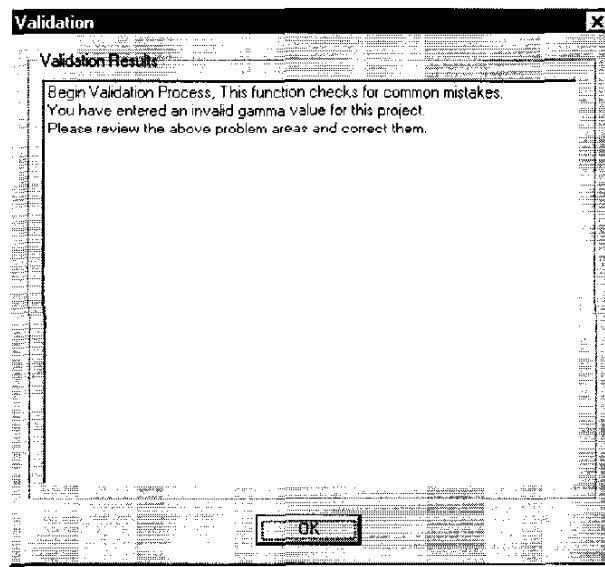

8.1 Edit

8.2 View

The View menu provides standard Windows commands for hiding or displaying the Toolbar and Status Bar.

8.3 Actions

There are two available options under the Actions menu, Validate and Execute Irregular Waves. The Validate menu item will scan through the current data set and look for common problems, the results are displayed on the Validate Dialog. The Execute menu item runs the seakeeping analysis.

8.4 Window

The Window menu provides standard Windows commands for arranging the display window.

8.5 Help

The Help menu provides standard Windows commands for help and general program information.
